

Design *meets* Function

HED's newest lineup of Linux displays are designed for rugged applications, are highly configurable with inputs, outputs, PCAP touchscreens, USB, video inputs, Ethernet, and wireless communication and offer programming options such as Crank, Qt, and CODESYS.

Touchscreen with gloves & in rain

IP67 sealed

Sunlight readable

-40C to +60/65C

Ultra-wide viewing angles

Shock & Vibration Resistant

CL-713/CL-714 The 5- and 7-inch displays feature a premium edge-to-edge glass design at an economical price point. Optional features include a PCAP touch screen or pushbuttons for easy navigation. Configured with optional I/O the display can help reduce the cost of the overall control architecture.

CL-715/CL-716 The larger 12.3- and 15-inch displays offer modern technology with features and performance to back it up. Multi-video display capability with 1920x720 resolution enhances safe vehicle operation and provides a superior operator interface with PCAP touchscreen for navigation and control. Automotive Ethernet provides consistency and speed for programming and digital video streaming. Superior performance is delivered through standard features like NVMe drive, NPU, and horsepower of the newest iMX processor.

HED CAN Displays

Consolidate vehicle controls and gauges into one place with our CAN displays. Customize screen design and layout for maximum functionality with our do-it-yourself programming software or our dedicated engineering team. High-brightness graphics, text and video. Made for harsh environments, our displays can be mounted in the cab or outside the vehicle.
